## ABOUT ME

I am Said Benli. My life is a journey where different passions intertwine. Since childhood, I have stepped into the world of books, getting lost among the pages and chasing new ideas.

Now, I am studying Computer Science at the **University of the People** in the United States. Through days filled with distance learning, I am discovering the fascinating world of codes and algorithms. My perseverance and discipline continue to guide me on this journey at the computer.

It is difficult to predict what the future will bring, but what matters to me is staying true to my passions and continuously improving myself. Every new day is a new opportunity for me. Life is an endless journey waiting to be discovered, and I am excited at every moment of this adventure.
